

iptaVMlite: QuickStart Guide

Installation on Intel/AMD-based architecture

1. Download and install VirtualBox

Download and install VirtualBox for your operating system from the link below:

<https://www.virtualbox.org/wiki/Downloads>

2. Import the VM image to VirtualBox

Start VirtualBox, and in the menu select:

File -> Import Appliance

Browse to the image '.ova' file to import, select it, and click

Import

3. Start the VM

Click 'Start' on VirtualBox Manager.

Installation on ARM-based architecture (Mac OSX only)

1. Download and install UTM

<https://mac.getutm.app/>

2. Import the VM image to UTM

Start UTM, and in the menu select:

File -> Open

Then browse to the '.utm' directory of the image, select it, and click

Open

3. Start the VM

Click the play button on UTM.
